

How to run the app

IZ Clinical Notes Analyzer

Prepared release only | 2.0.0-beta.3 | build 2026.09.03.1

Before you begin

Use a 64-bit Intel/AMD Windows 10/11 laptop and the R3 release ZIP.
Save it to a local folder outside OneDrive or other cloud-sync folders.
Arrange your first sign-in with R3 support; setup creates credentials locally.

No Python, Node.js, Git, Docker or PostgreSQL installation is needed for this prepared release.

1 Extract the ZIP

Right-click the ZIP and choose **Extract All**. Open the extracted folder.
Keep the **app** and **installer** folders with the command files.

2 Install once

Double-click **Install-IZ-Clinical-Notes-Analyzer.cmd**.
Wait for **Install completed**. Administrator access is not normally needed.

3 Start the app and open your browser

Use the **IZ Clinical Notes Analyzer** Desktop or Start Menu shortcut.
Then open Edge or Chrome and enter **http://localhost:8000**.

4 Sign in

Use the account and password arranged with R3. First-time admin sign-in requires a new password. Check that the footer matches the version above.

If something gets in the way

Page will not open	Use the Stop app shortcut. If asked to restart, choose N . Start again from the Desktop/Start Menu app shortcut, then reopen the browser.
Password or security block	Contact R3 support. Do not disable Windows protection or install developer tools to get past a message.
Support needs details	Use the IZ Clinical Notes Analyzer Diagnostics shortcut. Share the version, time and redacted message through the approved R3 channel.

When you finish

Sign out and lock Windows. Back up before updates. **Complete Uninstall deletes local data**; it is not a routine troubleshooting step.
